Now that you have added your IMDb account to the IMDb addon, you can now add it to the library and subscribe to TV Shows for auto updates.

You should also Subscribe. That will auto update when a new TV Shows episode airs on TV.

The items added to the library will appear above the home bar in Movies and TV Shows. TV Shows will pop up new episodes when they air. I would only add TV Shows that you are currently watching and Movies you want to watch. Everything else can be accessed through the IMDB lists.
